PROFESSIONAL SUMMARY

CRM Developer with 6+ years of experience in Zoho CRM and Salesforce development, integrations and automation. For more than 3 years at Room 8 Group, responsible for the technical development and maintenance of a production Zoho CRM environment: data model, Deluge functions, workflows, API integrations, CRM widgets and releases. Also responsible for the engineering practice around the platform — version control, dependency mapping, code review and controlled promotion to production — supported by internal tooling for configuration extraction and function audits. Previous experience includes Salesforce development at consulting partners and backend development with Java and Spring Boot.

CORE EXPERTISE

Zoho CRM — Deluge · custom modules · layouts · relationships · workflows · schedules · validation rules · Blueprints · roles and profiles · sharing rules · data modelling · Sandbox

Zoho development — Widgets · Canvas · Canvas Mobile Detail View · mobile widgets · Zoho SDK · Zoho REST APIs · Zoho Creator · Zoho Flow · Zoho Analytics · Zoho One

Integrations — Microsoft Graph · Outlook · Microsoft Teams · Teams bots · Entra ID · Power Automate · Google Workspace · Slack · Jira · Apollo · PeopleForce · Zapier · Make

Integration patterns — OAuth 2.0 · REST · SOAP · webhooks · pagination · rate limiting · retries · exponential backoff · idempotency · delta tokens · reconciliation · deduplication

Data & releases — Data migration · ETL · mapping · transformation · data quality · Git · GitHub Actions · Azure DevOps · CI/CD · code review · automated testing · release management

Development — JavaScript · TypeScript · HTML · CSS · Python · Java · Spring Boot · Node.js · SQL · PostgreSQL

AI — AI-assisted development · Claude · OpenAI API · embedded CRM features · MCP · Zoho native AI

Salesforce — Apex · SOQL · Lightning Web Components · Aura · Visualforce · Flows · Sales / Service / Experience Cloud · integrations

Certifications — Salesforce Platform Developer I (2021) · Salesforce Administrator (2021) · Salesforce JavaScript Developer I (2022)

PROFESSIONAL EXPERIENCE

ROOM 8 GROUP — CRM Engineer

Remote · April 2023 – Present · global game development services company

Sole developer responsible for a production Zoho CRM platform serving sales operations, business development and regional teams: data model, automation, widgets, integrations, release process and production support.

- Built and maintain integrations with Microsoft Graph, Microsoft Teams, Jira, Apollo, Slack and Google, including the authentication model, error handling, retry policy and reconciliation rules. Implemented pagination, rate-limit handling, exponential backoff, expired delta-token recovery and idempotent writes.
- Implemented multi-system orchestration across Microsoft Teams, Zoho CRM and Jira — system-of-record definitions, handoff rules and duplicate prevention — so that meeting context reaches CRM and issue tracking without manual re-entry.
- Defined and implemented the organisation's identity and record-merge model and applied it across all inbound integrations, replacing text-field pseudo-relations with junction modules and an explicit merge path.
- Developed internal tooling that extracts all CRM functions into a local searchable codebase, retrieves modules and configuration through Zoho APIs and MCP, maps dependencies and invocation paths, and generates a function-audit table. Introduced Git-based version control and review before promotion to production.
- Built and maintain 70+ widgets across 10 modules with shared components and a versioning model, including mobile layouts for the Zoho mobile app, automated browser tests at phone widths and offline harnesses that stub the Zoho SDK.
- Audited an inherited Zoho implementation and produced a prioritised remediation plan covering security and data-integrity issues; review other developers' work.

- Migrated and synchronised large datasets between CRM platforms using custom mapping, transformation and validation scripts in Python, Deluge, Apex and SQL.

NOLTIC — Salesforce Developer

Lviv, Ukraine (Remote) · June 2022 – March 2023 · Salesforce consulting partner

- Designed and delivered integrations between Salesforce and external services over REST and SOAP, with authenticated API flows, error handling and user-facing controls.
- Built and maintained the delivery pipeline: Git-based workflow, CI/CD with GitHub Actions, code review and release coordination across distributed teams.
- Developed and integrated Google Drive API functionality into Salesforce, including a custom Chrome extension for document management, then redesigned its architecture to improve scalability.
- Refactored Apex triggers, controllers and integration architecture for performance and maintainability.

SOFTSERVE — Salesforce Developer / Administrator

Remote (Ukraine) · February 2021 – May 2022

- Configured Salesforce environments to client requirements across Sales Cloud, Service Cloud and Experience Cloud — objects, layouts, roles, profiles, sharing rules and validation — on multiple concurrent implementations.
- Automated business processes with Apex, Flows and declarative tooling.
- Ran requirements workshops with business analysts and client stakeholders, then owned estimates, build, testing and technical documentation through to release for each approved change.

SYNEBO — Salesforce Developer

Odesa, Ukraine · October 2020 – February 2021

- Implemented and refactored Apex — triggers, batch, queueable and schedulable jobs — within Salesforce governor limits.
- Optimised SOQL queries for performance on large data volumes.
- Built user interfaces in Lightning Web Components, Aura and Visualforce.
- Wrote unit tests and worked with QA to reproduce and resolve defects before release.

LUXOFT — Java Software Engineer

Odesa, Ukraine · January 2020 – June 2020

- Developed Java and Spring Boot backend services for a navigation system.
- Implemented REST communication between services using Retrofit.
- Delivered features, change requests and defect fixes within a Scrum organisation of 50+ developers, integrating across multiple microservices.

EDUCATION

Master's Degree, Computer Networks and Telecommunications — Odessa National Academy of Telecommunications (A. S. Popov) · 2010 – 2016

Additional training — Algorithms and Data Structures; Front-End Pro (Hillel IT School)
